

Attwood Navigation Lights Ready for C-5 Compliance

Dear OEM Partners,

The compliance date for ABYC A-16 and ABYC C-5 will go into effect on August 1, 2023. ABYC A-16 is for the Installation of Electric Navigation Lights (7/2021) and ABYC C-5 is for the Construction and Testing of Electric Navigation Lights (7/2021).

To ensure ABYC C-5 Compliance, the Attwood Navigation Lighting portfolio is transitioning from legacy incandescent technologies to Attwood 2NM LightArmor LED Equivalents. Our team has launched drop-in SKU replacements for all our leading incandescent products to ensure ample supply and smooth transition for our OEM partners to the new equivalents.

These 2NM C-5 Compliant drop-in replacements are available for order. In July 2022, we had increased inventory of old and new product to allow additional time for transition, extending our discontinuation timeline for our legacy navigation products. These legacy products are available 'While Supplies Last' status with the intention to help work through remaining OEM inventory ahead of the new C-5 effective date of July 31st, 2023. Please work with your Attwood Customer Service and Sales Representatives to properly transition and ensure the non-compliant 1NM and Incandescent inventory will be used up well before July 31st.

Navico Group remains committed to supporting our OEM Partners to ensure boater safety and operational excellence. As always, please do not hesitate to connect with your regional sales representative with any questions or concerns. Please see below for general and specific information on the C-5 Transition and Crossover List:

- **Sidelights:** 1NM will no longer be OEM compliant offering – All parts transition to an equivalent 2NM offering
- **All-Rounds:** Incandescent (3900, 5100, 5300 Series) will no longer be OEM compliant offering – All parts transition to equivalent LightArmor LED offering (5500 Series)
